MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS

The accompanying consolidated financial statements of "SAVARIA CORPORATION" are the responsibility of management and have been approved by the Board of Directors.

These consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles and necessarily include some amounts that are based on management's best estimates and judgements.

To discharge its responsibilities, the Corporation has developed and maintains systems of internal accounting controls and has established policies and procedures adapted to the industry in which it operates. Such systems are designed to provide reasonable assurance that the financial information is relevant, reliable and accurate and that the Corporation's assets are appropriately accounted for and adequately safeguarded.

The Board of Directors must ensure that management fulfils its financial reporting responsibilities and is ultimately responsible for reviewing and approving the financial statements. The Audit Committee meets regularly with management to discuss the internal controls over the financial reporting process and financial reporting issues. The Committee also reviews the annual consolidated financial statements and the external auditors' report, and reports its findings to the Board for consideration when approving the financial statements for issuance to the Corporation's shareholders. The auditors appointed by the shareholders have full access to the Audit Committee, with or without management being present.

The consolidated financial statements as at December 31, 2010 and for the year ended on this date have been audited by the auditors appointed by the shareholders, KPMG LLP/s.e.n.c.r.l., Chartered Accountants.

Marcel Bourassa

B) Use of Estimates

The preparation of financial statements in accordance with Canadian GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The main estimates include the measurement of the fair value of the financial instruments, including derivatives and investments in restructured notes, the stock-based compensation expense, the amortization of fixed assets and intangible assets, goodwill, future income tax balances, the allowance for doubtfull accounts, the inventory obsolescence provision, the warranty provision as well as the measurement of intangible assets recorded as part of the business acquisitions. Actual results may differ from those estimates.

C) Foreign Currencies

The Corporation's functional currency is the Canadian dollar.

The US subsidiaries are defined as integrated foreign operations. The Corporation follows the temporal method to translate its foreign currency balances and those of its US subsidiaries. Under this method, monetary assets and liabilities are translated at the exchange rates in effect at the balance sheet date and non-monetary assets and liabilities are measured at historical rates. Revenues and expenses are translated at the average exchange rate for the period. Exchange gains and losses are included in net earnings for the year.

Since January 1, 2010, the Chinese subsidiary is defined as self-sustaining and the current rate method is used for converting its accounts. Prior to this date, this subsidiary was considered an integrated foreign subsidiary with the Canadian dollar as its functional currency. The Corporation adopted the Chinese Renminbi as the functional currency of its Chinese subsidiary as a result of the continued decentralization of its management, of the development of a local market for its products and services and of its cash flows no longer being dependent upon its parent company's activities. Under the current rate method, all assets and liabilities are translated using the exchange rate in effect at the balance sheet date, while revenues and expenses are translated into Canadian dollars using the average exchange rate for the period. Translation gains or losses are included in Shareholders' equity as Accumulated other comprehensive income.

D) Revenue Recognition

The Corporation recognizes its sales when persuasive evidence of an agreement exists, products have been shipped, price is determined and ultimate collection is reasonably assured. A provision for product warranty is set up when sales are recognized. Given that most products are custom made, goods, generally, may not be returned.

Revenues from installation contracts are recognized using the percentage-of-completion method based on installation costs incurred versus projected costs. Revenues from maintenance contracts are recognized on a straight-line basis according to the avancement of the contract period. Unrecognized revenues are recorded as deferred revenues.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

D) Revenue Recognition (Cont'd)

When more than one product or service is provided to a customer under one arrangement, the Corporation allocates revenue to each element of the arrangement based on the relative selling price as determined using the Corporation's best estimate of the selling price for that deliverable. Each element of the arrangement is recognized as described above.

E) Impairment of Long-Lived Assets

The Corporation reviews, when circumstances indicate that the asset might be impaired, the carrying values of its long-lived amortizable assets by comparing the carrying amount of the asset or group of assets to the expected future undiscounted cash flows to be generated by the asset or group of assets. An impairment loss is recognized when the carrying amount of an asset or group of assets held for use exceeds the sum of the undiscounted cash flows expected from its use or eventual disposal. The impairment loss is measured as the amount by which the asset carrying amount exceeds its fair value, based on quoted market prices, when available, or on the estimated current value of future cash flows.

F) Income Taxes

The Corporation follows the liability method of accounting for income taxes. Under this method, income taxes payable are accounted for as estimated income taxes to be paid for the current fiscal year, and future income taxes are accounted for based on the temporary differences between the tax and accounting values of the assets and liabilities. Future income tax assets and liabilities are measured using income tax rates and the enacted or substantively enacted laws which are expected to be in effect for taxable income for the years in which the assets and liabilities will be discharged or recovered. Future income tax assets which arise from deferred losses and temporary differences are accounted for when it is more likely than not that the asset will be realized. The effect of a change in income rates on future income tax assets and liabilities is charged to earnings in the year when the change is enacted or substantively enacted.

G) Cash and Cash Equivalents

Cash and cash equivalents consist of bank balances and temporary investments with an initial maturity of three months or less and are presented at cost.

H) Trade Receivables

The Corporation establishes an allowance for doubtful accounts receivable based on the specific credit risk of its customers and historical trends.

I) Inventories

Raw materials and sub-assembly components are valued at the lower of cost and net realizable value, with cost being determined using the first in, first out method.

Work in process and finished goods are valued at the lower of cost and net realizable value, with cost being determined using the first in, first out method. Their cost includes raw materials as well as an allocation of direct labour and manufacturing overhead.

When the circumstances that previously caused inventories to be written down below cost no longer exist or when there is clear evidence of an increase in net realizable value, the amount of the write-down is reversed up to the amount of the original write-down.

J) Fixed Assets and Amortization

Fixed assets are accounted for at cost. Amortization is based on their estimated useful life using the following methods and periods:

| | Method | Period |
|---|---|--|
| Machinery and equipment Office furniture Rolling stock Computer hardware Leasehold improvements | Straight-line Straight-line Straight-line Straight-line Straight-line | 5 to 15 years 5 to 10 years 5 to 10 years 3 to 5 years Terms of the leases |

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

J) Fixed Assets and Amortization (Cont'd)

During the year, the Corporation changed the method used for amortizing fixed assets from the declining balance method to the straight-line method. The Corporation came to the conclusion that this change in accounting estimates is necessary since it evaluates that the useful lives of, or expected pattern of consumption of the future economic benefits embodied in, depreciable assets is now better represented by the straight-line method. This change in accounting estimates has not had any significant impact on this year's earnings.

K) Intangible Assets

Intangible assets consist of trademarks, client lists, distribution licences, maintenance contracts, leases at favourable rate, customer orders, computer software and capitalized development costs. Trademarks are not amortized since they have an indefinite life span; instead, the Corporation assesses periodically whether a provision for impairment in the value of trademarks should be recorded against earnings. This is accomplished by determining whether projected discounted future cash flows exceed the net book value of the intangible asset. Trademarks are tested for impairment annually on December 31, and when an event or circumstance occurs that could potentially result in a decline in value.

Intangible assets are amortized based on their estimated useful life using the following methods and periods:

| | Method | Period |
|-------------------------------|---------------|---------------------|
| Client lists | Straight-line | 5 to 10 years |
| Distribution licences | Straight-line | 5 years |
| Maintenance contracts | Straight-line | 5 to 10 years |
| Leases at favourable rate | Straight-line | Terms of the leases |
| Customer orders | Straight-line | Term of delivery |
| | _ | of orders |
| Computer software | Straight-line | 5 years |
| Capitalized development costs | Straight-line | 3 years |

Development costs are accounted for at cost if the Corporation can demonstrate all of the following:

The technical feasibility of completing the intangible asset so that it will be available for use or sale; its intention to complete the intangible asset and use or sell it; its ability to use or sell the intangible asset; how the intangible asset will generate probable future economic benefits; the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and its ability to measure reliably the expenditure attributable to the intangible asset during its development.

Research and development tax credits are booked against deferred development costs when they are related to development costs. All other tax credits are booked against the expenses that they relate to.

L) Goodwill

Goodwill is not amortized; instead, the Corporation assesses periodically whether a provision for impairment in the value of goodwill should be recorded against earnings. This is accomplished by determining whether the implicit fair value of goodwill exceed net book value. Goodwill is tested for impairment annually on December 31, except for acquisitions completed during the year, and when an event or circumstance occurs that could potentially result in a decline in value.

The Corporation has performed impairment tests on the carrying amount of goodwill as at December 31, 2010 and has concluded that no impairment loss should be recognized.

M) Earnings Per Share

Basic net earnings per share is based on the weighted average of common shares issued and outstanding, and is calculated by dividing net earnings applicable to common shares by the weighted average number of shares outstanding during the period. Diluted net earnings per share is calculated by dividing net earnings applicable to common shares by the weighted average number of shares used in the basic earnings per share calculation plus the weighted number of common shares that would be issued, assuming that all potentially dilutive stock options outstanding were translated using the treasury stock method.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Cont'd)

N) Stock-Based Compensation

The Corporation records stock-based compensation to its employees, consultants and directors at fair value. According to the fair value method, an employee compensation expense is charged to selling and administrative expenses based on the fair value of the stock options issued over their vesting period. Upon the exercise of stock options, capital stock is credited in the amount paid plus the corresponding employee compensation expense previously recorded.

O) Financial Instruments

The Corporation records all financial assets and derivitave financial instruments at their fair value or amortized cost. Financial liabilities are measured at their fair value when they are classified as held-for-trading; otherwise, they are measured at amortized cost.

The Corporation must carry out a classification of its assets and liabilities by category. It made the following classifications:

Cash and cash equivalents and cash and cash equivalents reserved, long-term investments in restructured notes and the put option are classified as assets held-for-trading. These items are evaluated at fair value and gains or losses resulting from their reevaluation at the end of each period are recorded as part of the consolidated earnings.

Long-term investments other than restructured notes are classified as held-to-maturity. They are initially evaluated at fair value and, afterwards, are recorded at their amortized cost.

Accounts receivable and long-term loans are classified as loans and receivables. They are initially evaluated at their fair value and are subsequently recorded at their amortized cost.

Bank loans, accounts payable and accrued liabilities as well as long-term debt are classified as other financial liabilities. They are initially measured at their fair value and, afterwards, are recorded at their amortized cost.

Transaction costs related to financial assets and liabilities held-for-trading are expensed as incurred. Transaction costs related to financial assets held-to-maturity, loans and receivables and other liabilities are included in the carrying value of the asset or liability and are then amortized over the expected life of the instrument using the effective interest rate method.

Gains and losses on financial instruments designated as cash flow hedges are recognized in the Corporation's results in the same period as the underlying transactions. Variances in the fair value of non-designated financial instruments are recognized immediately.

Foreign exchange forward contracts are classified as assets held-for-trading. The contracts are remeasured at their fair value at the end of each period.

3. NEW ACCOUNTING POLICIES

A) 2010

Multiple Deliverable Revenue Arrangements:

On December 24, 2009, the Canadian Institute of Chartered Accountants' ("CICA") Emerging Issues Committee issued Abstract No. 175 ("EIC-175"). EIC-175, *Multiple Deliverable Revenue Arrangements*, amends the guidance contained in EIC-142, *Revenue Arrangements with Multiple Deliverables*, and establishes additional requirements regarding revenue recognition related to multiple deliverables as well as supplementary disclosures. EIC-175 is applicable prospectively, with retrospective adoption permitted, to revenue arrangements with multiple deliverables entered into or materially modified in the first annual period beginning on or after January 1, 2011; however early adoption is permitted.

This new Abstract was early adopted by the Corporation at the time of acquisition of one of its subsidiaries in 2010 which enters into arrangements with multiple deliverables.

B) Future Accounting Changes

Section 1582: Business Combinations, Section 1601: Consolidated Financial Statements, and Section 1602: Non-Controlling Interests

In 2009, the CICA issued three new accounting standards: Section 1582, *Business Combinations*, Section 1601, *Consolidated Financial Statements*, and Section 1602, *Non-Controlling Interests*. These new standards will apply to the Corporation's financial statements for the fiscal year beginning on January 1, 2011. The Corporation does not expect that these three new standards will have any material impact on its consolidated financial statements.

DECEMBER 31, 2010 AND 2009

3. NEW ACCOUNTING POLICIES (Cont'd)

Section 1582 replaces Section 1581, and establishes standards for the recognition of a business combination. It provides the Canadian equivalent to International Financial Reporting Standard IFRS 3, *Business Combinations*. The Section applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2011.

Sections 1601 and 1602 replace Section 1600, *Consolidated Financial Statements*. Section 1601 establishes standards for the preparation of consolidated financial statements. It applies to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. Section 1602 establishes standards for the recognition of a non-controlling interest in a subsidiary. It is equivalent to the corresponding provisions of International Accounting Standard IAS 27, *Consolidated and Separate Financial Statements*, and applies to interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011.

International Financial Reporting Standards ("IFRS")

In February 2008, Canada's Accounting Standards Board confirmed that Canadian GAAP, as used by public corporations, will be superseded by IFRS for fiscal years beginning on or after January 1, 2011. The Corporation will be required to report under IFRS for its interim and annual financial statements for the fiscal year ending December 31, 2011.

4. BUSINESS ACQUISITIONS

On February 1, 2010, the Corporation acquired 100% of the outstanding common shares of Concord Elevator (London) Ltd. ("Concord London"), a retailer specialized in the installation and maintenance of elevators and platform lifts in the province of Ontario. The agreement provides for an initial payment of \$1,500,000 on the date of acquisition and four annual payments of \$600,000 on the anniversary date of the acquisition. This note payable bears no interest and was recorded at its estimated fair value based on the net present value of the future cash flows calculated at a rate of 6.5%. The transaction includes a potential 1 million common shares to be issued one year after the signing of the agreement if certain conditions are met. In the second quarter, given the certainty that the said conditions will be met, the shares to be issued have been recorded in the amount of \$1,200,000 under the heading of capital stock to be issued and will be issued in February 2011.

On July 19, 2010, the subsidiary Savaria Lifts Ltd. ("Savaria Lifts") acquired certain assets and liabilities of Concord Elevator (Alberta) Ltd., a retailer specialized in the installation and maintenance of elevators and platform lifts in the province of Alberta. The agreement provides for an initial payment of \$240,000 on the date of acquisition as well as a payment of \$100,000 on the first anniversary date of the acquisition. The note payable bears no interest and was recorded at its estimated fair value based on the net present value of the future cash flows calculated at a rate of 6.5%.

On August 2, 2010, the Corporation acquired 100% of the outstanding common shares of Freedom Motors Inc. ("Freedom"), a corporation specialized in the conversion of mini-vans for people with disabilities. The agreement provides for an initial payment of \$2,560,000 on the date of acquisition as well as a payment of \$500,000 on the first anniversary date of the acquisition. The note payable related to this acquisition bears no interest and was recorded at its estimated fair value based on the net present value of the future cash flows calculated at a rate of 6.5%.

On August 2, 2010, the Corporation acquired 100% of the outstanding common shares of The Liberty Motor Company Inc. ("Liberty"), a corporation specialized in the conversion of mini-vans for people with disabilities. The agreement provides for the issuance of 100,000 common shares and an initial payment of \$250,000 on the date of acquisition as well as two annual payments of \$125,000 on the anniversary date of the acquisition. The note payable related to this acquisition bears no interest and was recorded at its estimated fair value based on the net present value of the future cash flows calculated at a rate of 6.5%.

These acquisitions have been accounted for using the purchase method, and the operating results have been included in the consolidated financial statements from the dates of acquisition. The breakdown of Concord London's and Savaria Lifts' purchase price presented below are final while those of Freedom and Liberty are preliminary and are based on the Corporation's estimates since certain information is not yet available.

| | | | | | | | |

Of the \$1,809,814 of acquired intangible assets, \$690,418 was assigned to customer lists, \$870,000 to maintenance contracts, \$231,757 to customer orders and \$17,639 to a lease at favourable rate.

The \$4,468,041 of goodwill was assigned to the Accessibility and the Adapted vehicles segments in the amounts of \$3,698,296 and \$769,745, respectively. Of that total amount, \$149,840 is expected to be deductible for tax purposes. The beginning balance of \$506,230, associated with the Accessibility segment, is added to this amount of \$4,468,041 for a total amount of goodwill of \$4,974,271 as at December 31, 2010.

5. CASH FLOWS

A) Interest Expenses and Income Taxes

Cash flows related to interest expenses and income taxes are as follows:

| | 2010 | 2009 |
|-------------------|---------------|---------------|
| Interest paid | \$ 621,760 | \$ 439,364 |
| Income taxes paid | \$ 147,229 | \$ 59,740 |
| | | |

B) Net Changes in Non-cash Working Capital Items

| | 2010 | 2009 |
|---|----------------|--------------|
| Accounts receivable | \$ (699,482) | \$ 2,121,091 |
| Inventories | 667,308 | (2,290,729) |
| Prepaid expenses | 53,631 | (204,479) |
| Research and development credits receivable | (101,502) | (107,322) |
| Accounts payable | (2,359,300) | 223,245 |
| Deferred revenues | 559,895 | (95,336) |
| Income taxes payable | 41,663 | - |
| Warranty provision | (67,673) | (181,734) |
| | \$ (1,905,460) | \$ (535,264) |
| | | |

5. CASH FLOWS (Cont'd)

C) Non-cash Transactions

In 2009 and 2010, there were non-cash transactions related to capital leases recorded as fixed assets and their corresponding long-term debt in the amount of \$28,191 (2009 - \$119,538). Furthermore, in 2010, there were non-cash transactions related to the conversion of accounts receivable to long-term loans in the amount of \$78,075.

6. OTHER REVENUES AND EXPENSES

| | 2010 | 2009 |
|---|-----------------|---------------|
| Interest and dividend income | \$ 52,077 | \$ 54,406 |
| Loss on foreign currency exchange | (256,252) | (393,402) |
| Interest on long-term debt | (531,673) | (319,655) |
| Interest expense and bank charges | (149,296) | (119,709) |
| Change in the fair value of restructured notes (note 9) | 90,155 | 565,163 |
| Put option (note 9) | (139,393) | 348,217 |
| Gain on disposal of fixed assets | 4,201 | 7,660 |
| Other revenues | 32,023 | 4,410 |
| | \$ (898,158) | \$ 147,090 |
| | | |

7. ACCOUNTS RECEIVABLE

| | 2010 | 2009 |
|---------------------------------|------------------|-----------------|
| Trade | \$ 10,273,976 | \$ 8,397,563 |
| Allowance for doubtful accounts | (652,803) | (1,480,553) |
| | 9,621,173 | 6,917,010 |
| Sales taxes recoverable | 658,229 | 512,937 |
| Other | 164,761 | 25,242 |
| | \$ 10,444,163 | \$ 7,455,189 |
| | | |

8. INVENTORIES

| | 2010 | 2009 |
|---|------------------|------------------|
| Raw materials and sub-assembly components | \$ 11,771,315 | \$ 10,392,372 |
| Work in process | 413,104 | 658,190 |
| Finished goods | 2,351,861 | 1,549,089 |
| | \$ 14,536,280 | \$ 12,599,651 |
| | | |

The following table shows how the obsolescence provision changed during the year:

| | | 2010 | 2009 |
|---|----|-------------|-------------------|
| Obsolescence provision at the beginning of the year | \$ | (1,794,673) | \$ (1,955,419) |
| Increase in the provision | į. | (36,641) | (49,998) |
| Discarded inventory | ļ | 1,785,776 | 210,744 |
| Obsolescence provision at the end of the year | \$ | (45,538) | \$ (1,794,673) |
| | | | |

The amount of inventories recognized as cost of sales totalled \$43,700,349 for fiscal 2010 (2009 - \$39,696,408).

9. LONG-TERM INVESTMENTS

| | 2010 | 2009 |
|---|--------------|--------------|
| Restructured notes (face value of \$1,917,356, \$2,185,039 in 2009) | \$ 1,290,041 | \$ 1,309,568 |

| Guaranteed investment certificate (fair value of \$4,100,000 in 2009) | - | 4,100,000 |
| | \$ 1,498,865 | \$ 5,757,785 |
| | | |

9. LONG-TERM INVESTMENTS (Cont'd)

The Corporation holds investments with a face value of \$1,917,356 (US\$1,927,766) that are invested in restructured notes following the replacement of Asset-Backed Commercial Paper ("ABCP"). These investments were valued at their fair value at year end.

The restructured notes are classified as held-for-trading financial instruments.

The fair value estimate of the restructured notes has been calculated based on information provided by the Pan-Canadian Investor Committee, Ernst & Young Inc., the Monitor of the restructuring, and BlackRock Canada Ltd., the asset administrator.

Using this information, the Corporation was able to determine the key characteristics of each class of restructured notes received: face value, credit rating, interest rate, projected interest payments and maturity date. It then estimated the return that a prospective investor would require for each class of notes ("Required Yield"). Lastly, it calculated the net present value of the future cash flows for each class using the Required Yield as the discount factor.

During the year, the fair value of the restructured notes was positively and negatively affected by a number of factors, including a general improvement in the credit markets, an increase in interest rates, an improvement in the net asset value underlying the asset-tracking notes, the decrease in value of the US dollar in relation to the Canadian dollar and the simple passage of time.

The net impact of these positive and negative factors was an increase in the fair value of the restructured notes during the year. As a result of this analysis, the Corporation estimated the fair value of these notes to be \$1,290,041 (US\$1,297,045) as at December 31, 2010. Accordingly, the Corporation recorded a \$90,155 gain during the year, as partial reversal of losses recorded in prior years. Following this gain in value, there remains a balance of the reserve for impairment of \$627,315 (US\$630,721). It is to be pointed out that these notes are subject to uncertainty as to their eventual cash value. Although management believes that its valuation technique is appropriate under the circumstances, changes in significant assumptions could materially affect the value of the restructured notes in upcoming quarters. The resolution of these uncertainties could result in the ultimate value of these investments varying significantly from management's current best estimates. These investments are presented on a long-term basis.

During fiscal 2010, the Corporation received a total of \$109,682 (US\$104,196) in repayment of certain restructured notes. The amounts received were used as a partial reimbursement on loans secured by the restructured notes. As at December 31, 2010, the face value of the remaining restructured notes amounted to \$1.9 million (US\$1.9 million) broken down as follows:

| Face value Estimated fair value * | | | |
|-----------------------------------|------------------------------|--------------------------------------|--|
| | | | |
| \$ 835,383 | \$ | 707,659 | July 15, 2056 |
| 25,922 | | 259 | July 15, 2056 |
| | | | |
| 131,524 | | 67,547 | March 20, 2014 |
| 934,937 | | 521,580 | December 25, 2036 |
| \$ 1,927,766 | \$ | 1,297,045 | |

^{*} the range of fair values estimated by the Corporation varied between US\$1.32 million and US\$1.27 million

On March 16, 2009, the Corporation signed two long-term financing agreements with its financial institution to ensure the sufficient availability of liquidity to meet its financial obligations while awaiting the disposal of the restructured notes.

The Corporation holds an option to assign to the bank the ownership of its ineligible asset-tracking notes as well as any proceeds therefrom as payment of 75% of the principal on the related debt. As at December 31, 2010, the Corporation estimated the fair value of this option at \$208,824 (US\$209,958).

The Corporation also holds an option to assign to the bank the ownership of its MAV 2 notes as well as any proceeds therefrom as payment of 45% of the principal on the related debt. As at December 31, 2010, the Corporation estimated the fair value of this option to be nil.

10. LONG-TERM LOANS

| | 2010 | 2009 |
|--|-----------|------------|
| The long-term loan is part of an exclusive distribution agreement for the Corporation's products with a US company. The original amount of the loan is \$198,920 (US\$200,000). The balance of the loan as at December 31, 2010 is \$99,460 (US\$100,000). The loan is without interest and is payable in ten annual instalments beginning in June 2006. | \$ 99,460 | \$ 126,120 |
| The long-term loan is part of a distribution agreement for the Corporation's products with a US company. The original amount of the loan is \$298,380 (US\$300,000) of which \$74,595 (US\$75,000) is the result of a transfer from accounts receivable. The balance of the loan as at December 31, 2010 is \$268,542 (US\$270,000). The loan is without interest, if sales volume objectives are met, and is payable in twelve equal monthly instalments of \$4,972 (US\$5,000) followed by 36 equal monthly instalments of \$6,631 (US\$6,667) beginning in July 2010. | 268,542 | _ |

13. BANK LOANS

The Corporation has a line of credit in the amount of \$1,500,000 for its subsidiary Van-Action (2005) Inc., bearing interest at prime rate plus 1.25%. A movable hypothec from Van-Action in the amount of \$3,000,000 on certain assets of the subsidiary, a guarantee pursuant to Section 427 of the *Bank Act* on inventories, as well as a surety bond from the parent company in the amount of \$250,000 have been pledged as securities. The balance of the line of credit amounted to \$340,000 as at December 31, 2010 (2009 - \$1,080,000).

The Corporation also has a line of credit in the amount of \$2,000,000 for its subsidiary Savaria Concord Lifts Inc., bearing interest at prime rate plus 0.5%. A \$25,000,000 first ranking movable hypothec on all the subsidiary's present and future inventories and receivables, and a guarantee on inventories pursuant to Section 427 of the *Bank Act* as well as a \$2,000,000 first ranking guarantee on the US dollar bank account have been pledged as securities. A surety bond in the amount of \$2,000,000 by both of the subsidiaries Freedom and Liberty have also been pledged as securities. The balance of the line of credit amounted to \$1,650,000 as at December 31, 2010 (2009 - nil).

14. ACCOUNTS PAYABLE

| | 2010 | 2009 |

| Sales taxes payable | 32,469 | - |
| | \$ 6,686,515 | \$ 6,248,985 |
| | | |

15. WARRANTY PROVISION

During the normal course of its business, the Corporation assumes the cost of certain components in replacement of defective components under warranties offered on its products. The warranties cover a period of three (3), twelve (12) or thirty-six (36) months depending on the product. During fiscal 2010, apart from the increase related to the acquisitions in the amount of \$191,435, the Corporation decreased its provision by \$67,673 (2009 - \$181,734). This expense is based on past experience and is recorded as current and long-term liabilities under the heading Warranty provision. Nevertheless, conditions may change and a significant amount may need to be recorded.

16. LONG-TERM DEBT

| | 2010 |
|---|--------------|
| Loan with an original face value of \$6,000,000 and a fair value of \$5,604,365 bearing interest at prime rate minus 1% with an effective interest rate of prime plus 1.5%. A mortgage on the Corporation's overall assets and those of its subsidiairies Savaria Concord Lifts Inc. and Van-Action (2005) Inc. in the amount of \$6,600,000 are pledged as securities. Repayable in monthly instalments of \$90,909 plus interest, maturing in May 2014. | \$ 3,571, |
| Loan in original amount of \$4,000,000 bearing interest at prime rate plus 1%. A mortgage on the Corporation's overall assets and those of its subsidiairy Savaria Concord Lifts Inc. in the amount of \$4,000,000 is pledged as security. Repayable in monthly instalments of \$66,667 plus interest, maturing in September 2014. In accordance with the terms of this loan, a minimum of 50% of the balance of the loan must be maintained in the bank at all times, free of any liens. The amount of the reserve, which had a balance of \$1,500,000 as at December 31, 2010, is distributed between current and long-term assets according to the same distribution as the said loan, which is \$400,000 current and \$1,100,000 long-term. | 3,000, |
| Loan in original amount of \$2,000,000 bearing interest at prime rate plus 1%. A mortgage on the Corporation's overall assets in the amount of \$10,500,000 as well as a surety bond in the amount of \$2,000,000 by each of the subsidiaries Savaria Concord Lifts Inc, Freedom and Liberty are pledged as security. Repayable in monthly instalments of \$33,333 plus interest, maturing in September 2015. | 1,900, |
| | |

Loan in original amount of US\$1,514,083 with a balance of US\$1,066,461 as at December 31, 2010, bearing interest at US prime rate less 1%. Only interest is payable on a monthly basis and a portion of the restructured notes is pledged as security. Any proceeds from the partial or complete disposal of the restructured notes will be used to reduce the amount of the loan. The loan matures in March 2012 and is renewable for one-year periods, subject to the financial institution's approval, up to a maximum of four renewal periods. The Corporation holds an option to assign to the bank the ownership of its ineligible asset-tracking notes as well as any proceeds therefrom as payment of 75% of the principal of this loan (note 9). This loan was renewed for a one-year period in February 2011.

Loan in original amount of US\$1,471,791 with a balance of US\$912,309 as at December 31, 2010, bearing interest at US prime rate less 1%. Only interest is payable on a monthly basis and a portion of the restructured notes is pledged as security. Any proceeds from the partial or complete disposal of the restructured notes will be used to reduce the amount of the loan. The loan matures in March 2011 and is renewable for one-year periods, subject to the financial institution's approval, up to a maximum of five renewal periods. The Corporation holds an option to assign to the bank the ownership of its MAV 2 notes as well as any proceeds therefrom as payment of 45% of the principal of this loan (note 9). This loan was renewed for a one-year period in February 2011.

Loan in the original amount of \$500,000. This loan is divided into two portions of \$250,000 both bearing interest at prime rate plus 2.25%. It is repayable in monthly instalments of \$10,417 plus interest, maturing in April 2010. A movable hypothec from Van-Action in the amount of \$3,000,000 on certain assets of the subsidiary, a guarantee pursuant to Section 427 of the *Bank Act* on inventories as well as a surety bond from the parent company in the amount of \$250,000 have been pledged as security.

Note payable related to a business acquisition with an original face value of \$2,377,735 and a fair value of \$2,034,573, bearing no interest with an effective interest rate of 6.5%. Repayable by way of a first instalment of \$577,735 in February 2011 followed by 3 annual instalments of \$600,000, maturing in February 2014.

Note payable related to a business acquisition with an original face value of \$420,817 and a fair value of \$395,133, bearing no interest with an effective interest rate of 6.5%. Repayable by way of a single instalment in August 2011.

Note payable related to a business acquisition with an original face value of \$206,895 and a fair value of \$187,104, bearing no interest with an effective interest rate of 6.5%. Repayable by way of a first instalment of \$81,895 in August 2011 followed by a second instalment of \$125,000 in August 2012.

17. INCOME TAXES AND FUTURE INCOME TAXES (Cont'd)

C) Losses Carried Forward

As at December 31, 2010, the Corporation had federal, Quebec, Ontario and Alberta net operating losses carried forward of \$4,034,000 (2009 - \$3,086,000), \$1,805,000 (2009 - \$3,004,000), \$2,665,000 (2009 - \$2,297,000) and \$139,000 (2009 - nil), respectively. These losses carried forward expire at various dates between 2014 and 2030.

As at December 31, 2010, the Corporation had deductible research and development expenses at the federal and Ontario level in the amount of \$944,473 (2009 - \$1,924,000) and at the Quebec level of \$1,276,087 (2009 - \$1,924,000) that can be deferred indefinitely.

The Corporation also had federal tax credits in the amount of \$830,000 (2009 - \$770,000) as well as Ontario tax credits of \$51,065 (2009 - nil). These tax credits expire at various dates between 2014 and 2030.

As at December 31, 2010, the Corporation had United States federal and state net operating losses carried forward of \$926,000 (US\$931,000) and \$533,000 (US\$536,000), respectively. As at December 31, 2009, these amounts were \$953,000 (US\$907,000) and \$538,000 (US\$512,000), respectively. Future income taxes have not been recorded on these losses. They expire at various dates between 2014 and 2030.

18. CAPITAL STOCK

A) Authorized:

Unlimited number of common shares with voting rights, participating and without par value Unlimited number of first preferred shares without par value and issuable in series Unlimited number of second preferred shares without par value and issuable in series

In 2007, the Corporation issued 475,000 common shares following the exercise of stock options at \$1 per share; in consideration, a long-term loan in the amount of \$250,000 was issued to a director who is also an employee, generating a net cash flow of \$225,000. The long-term loan is classified as a reduction of capital stock and the number of issued stock options was increased by 200,000 options. Contingent loan repayments will result in a corresponding increase in capital stock and, consequently, the number of options outstanding will be reduced. This loan was renewed in 2010 and a stock-based compensation expense in the amount of \$42,560 was charged to earnings during the year. The loan bears interest at prime rate less 1% and is secured by 200,000 common shares of the Corporation having a market value of \$316,000 as at December 31, 2010. Interest is compounded and payable on an annual basis while the principal is payable at maturity, on February 23, 2013.

During 2009, the Corporation repurchased 4,695,795 common shares at a price of \$0.929 per share by way of a substantial issuer bid. The excess of the price paid over the book value of the repurchased shares has been recorded against retained earnings.

B) The following table reconciles the average number of common shares outstanding with the calculation of the basic and diluted net earnings per share:

| | 2010 | 2009 |
|---|------------|------------|
| Weighted average number of shares outstanding (including the effect of the number of shares to be issued) | 22,650,527 | 25,398,499 |
| Effect of potential dilutive securities | | |
| Stock options | 218,040 | 12,662 |
| Weighted average number of common shares outstanding for use in determining diluted earnings | | |
| per share | 22,868,567 | 25,411,161 |
| | | |

In calculating net diluted earnings per share for 2010 and 2009, 537,500 and 1,444,750 stock options were excluded due to their antidilutive effect.

19. STOCK-BASED COMPENSATION PLAN

According to a stock option agreement for employees, consultants and directors of the Corporation, the Board of Directors may, at its discretion but without exceeding 1,742,659 shares, grant them options to purchase common shares of the Corporation at an exercise price established by the Board. The exercise price is the closing price of the day preceding the option grant date. Options generally vest between one and five years from the date of grant and must be exercised within a maximum of six years, except in the event of retirement, termination of employment or death. The value of each option is estimated at the date of grant using the Black-Scholes option pricing model with the following assumptions:

19. STOCK-BASED COMPENSATION PLAN (Cont'd)

| 2010 | | | | | | | |
|-------|-------------------------|--|-------|---------------------|---------------|--|--|
| Nun | nber of options granted | Risk-free interest rate Dividend yield E | | Expected volatility | Expected term | | |
| | 75,000 | 2.60% | 9.93% | 65% | 3 years | | |
| | 50,000 | 2.60% | 9.93% | 53% | 4 years | | |
| | 60,000 | 2.23% | 9.93% | 53% | 4 years | | |
| | 200,000 | 2.11% | 9.93% | 53% | 5 years | | |
| | 12,500 | 1.94% | 9.93% | 65% | 3 years | | |
| Γotal | 397,500 | 2.28% | 9.93% | 53 to 65% | 3 to 5 years | | |

| 2009 | | | | | | |
|-------|-------------------------|-------------------------|----------------|---------------------|---------------|--|
| Nu | mber of options granted | Risk-free interest rate | Dividend yield | Expected volatility | Expected term | |
| | 75,000 | 1.72% | 7.53% | 49% | 3 years | |
| | 50,000 | 3.20% | 7.53% | 49% | 6 years | |
| | 18,750 | 1.72% | 7.53% | 49% | 3 years | |
| Total | 143,750 | 2.24% | 7.53% | 49% | 3 to 6 years | |

The estimated fair value of the options granted in 2010 is \$103,556 (2009 - \$24,775). This amount is amortized and charged to earnings as the rights to exercise are vested.

The compensation expense of \$162,522 (2009 - \$110,200) on options granted to employees, consultants and directors has been credited to contributed surplus.

20 . CAPITAL RISK MANAGEMENT

The Corporation defines the components of its capital structure as being long-term debt and bank debt, net of cash and cash equivalents and cash equivalents reserved, temporary and long-term investments, plus shareholders' equity.

| | 2010 | 2009 |
|---|-------------------|-------------------|
| Cash and cash equivalents | \$ (6,040,620) | \$ (4,823,164) |
| Cash and cash equivalents reserved, including current portion | (1,500,000) | (1,900,000) |
| Bank loans | 1,990,000 | 1,080,000 |
| Long-term debt, including current portion | 13,391,765 | 10,696,919 |
| Long-term investments | (1,498,865) | (5,757,785) |
| | 6,342,280 | (704,030) |
| Shareholders' equity | 22,638,547 | 20,788,554 |
| Total capital structure | \$ 28,980,827 | \$ 20,084,524 |
| | | |

The Corporation's objectives when managing capital are:

- to safeguard the Corporation's ability to continue as a going concern in order to provide returns to its shareholders;
- to maintain the Corporation's ability to finance significant projects and strategic acquisitions;
- to redeem shares based on the Corporation's share repurchase and cancellation program.

The Corporation sets the amount of capital in proportion to risk. The Corporation manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Corporation may adjust the amount of dividends paid to shareholders, issue new shares, sell assets to improve its financial performance and flexibility or change its share repurchase and cancellation program. The Corporation has not changed the way it manages its capital since last year.

The Corporation must comply with certain conditions under its various banking arrangements.

These requirements include, on a consolidated basis, maintaining on a quarterly basis a minimum working capital of 1.50:1 and maximum debt ratio of 3.25:1 and, on an annual basis, a ratio of interest bearing debt net of cash over earnings before interest, taxes and amortization ("EBITDA") maximum of 3.00:1 and a minimum ratio of fixed-charge coverage of 1.10:1. The fixed-charge coverage ratio is defined as being EBITDA plus cash at the beginning of the year net of non-financed fixed asset additions and share repurchases for cancelation over the total of capital payments due and/or payable on long-term debt plus interest and dividends. The Corporation must also maintain at all times a loan value that is higher than the total balance of its current and long-term loans, excluding the long-term loans with original amounts of \$4,000,000, US\$1,514,083 and US\$1,471,791. The loan value is defined as being the total value of 75% of Canadian trade receivables, 65% of US trade receivables and 50% of inventory net of trade liabilities under 30 days, up to a maximum amount of \$3,500,000, and the cash balance of the US dollar account to a maximum of \$2,000,000, of the subsidiaries Savaria Concord Lifts Inc., Freedom and Liberty.

For its Savaria Concord Lifts Inc. subsidiary, requirements include maintaining on a quarterly basis a minimum working capital ratio of 1.10:1 and a maximum debt-to-equity ratio of 2.50:1. The total amount drawn on the line of credit cannot exceed the total value of 75% of Canadian trade receivables, 65% of US trade receivables, 50% of raw materials and 35% of finished goods.

20 . CAPITAL RISK MANAGEMENT (Cont'd)

As for its Van-Action (2005) Inc. subsidiary, it must maintain on a quarterly basis a minimum working capital of \$1,200,000 and a maximum debt-to-equity ratio of 2.10:1. The maximum amount that the subsidiary may draw from its line of credit is the lower of \$1,500,000 and the total value of 90% of its Canadian trade receivables that benefit from government grants, 80% of all other Canadian trade receivables, 80% of Swedish trade receivables, 40% of raw materials net of trade liabilities under 30 days and 50% of vehicles with a maximum value of \$350,000.

The Corporation was in compliance with all of the ratio requirements of its lenders throughout the year.

21. RELATED PARTY TRANSACTIONS

The Corporation recorded an amount of \$58,151 (2009 - \$49,842) for services rendered by an entity whose officer is a director and chief financial officer of the Corporation. The transactions occurred in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

22. COMMITMENTS AND CONTINGENCIES

A) Commitments

The Corporation concluded lease agreements for the rental of its premises and entered into operating leases for rolling stock and equipment for a total of \$3,507,079 (2009 - \$4,267,538). Future minimum lease payments under these operating leases, as at December 31, 2010, are as follows:

| | 2011 2012 | | 2013 | 2014 | | | | |
|---|-----------|-----------|------|-----------|---------------|----|--------|--|
| ſ | \$ | 1,923,426 | \$ | 1,462,456 | \$ 106,309 | \$ | 14,888 | |

B) Contingencies

Various claims and legal proceedings have been initiated against the Corporation in the normal course of its operating activities. Although the outcome of these proceedings cannot be determined with certainty, management estimates that any payments resulting from their outcome are not likely to have a substantial negative impact on the Corporation's consolidated financial statements.

| | | | | | • | | |

Financial risk factors

The Corporation's activities expose it to a variety of financial risks: market risks (including currency risk, interest rate risk and price risk), credit risk and liquidity risk. In order to minimize the potential adverse effects on the Corporation's financial performance, the Corporation uses derivative financial instruments to hedge certain risk exposures. Treasury is managed centrally to allow for identification, evaluation and hedging of financial risks.

A) Market risks

Currency risk

The Corporation realizes approximately 52% (2009 - 57%) of its sales in foreign currencies and, accordingly, is exposed to market risks related to foreign exchange fluctuations. The Corporation partially compensates for these risks by purchasing materials in US dollars and by using derivative financial instruments such as forward foreign exchange contracts. These contracts oblige the Corporation to sell US dollars at a predetermined rate.

Management has implemented a policy to manage foreign exchange risk against the Corporation's functional currency. The objective of the policy is to minimize the risks related to foreign currency transactions, more specifically in US dollars, in order to protect the gross margin from significant foreign currency fluctuations and to avoid management speculation on currency values. The Corporation manages this risk exposure by entering into various foreign exchange forward contracts. Pursuant to the policy, a maximum of 75% of anticipated net inflows in US dollars must be hedged.

The Corporation has at its disposal a line of treasury in the amount of \$2,300,000 in order to cover foreign exchange risks associated with its forward foreign exchange contracts.

The following tables summarize the Corporation's commitments to sell foreign currencies as at December 31:

| 2010 | | | | | | |
|---------------|------|-----------------------|--|--|--|--|
| Maturity | Туре | Average exchange rate | Contractual amounts (in US dollars) | | | |
| 0 to 5 months | Sale | 1.0432 | \$2,250,000 | | | |
| 2009 | | | | | | |
| Maturity | Туре | Average exchange rate | Contractual amounts (in US dollars) | | | |
| 0 to 9 months | Sale | 1.0821 | \$18,000,000 | | | |

The fair value of derivative financial instruments generally reflects the estimated amounts that the Corporation would pay or receive upon a hypothetical settlement of the contracts at year-end.

The fair value of the financial instruments which are presented as Accumulated other comprehensive income, before income taxes of \$753,139 (December 31, 2009 - \$760,950), is as follows as at December 31:

| | 2010 | 2009 |
|--|-----------------|-----------------|
| Unrealized gains on forward exchange contracts maturing in the next twelve months | \$ 105,395 | \$ 555,484 |
| Gains on forward exchange contracts cashed in advance that will be recognized in the next | | |
| twelve months | 2,093,952 | 501,244 |
| | 2,199,347 | 1,056,728 |
| Gains on forward exchange contracts cashed in advance that will be recognized after the next | | |
| twelve months | 667,346 | 1,715,756 |
| | \$ 2,866,693 | \$ 2,772,484 |
| | | |

As at December 31, 2010 and 2009, with other variables unchanged, an upward or downward change of \$0.01 in the value of the Canadian dollar against the US dollar would have a negligeable impact on comprehensive income's Change in the fair value of foreign exchange contracts designated as cash flow hedges.

Gains and losses on financial instruments are recognized as follows in the financial statements:

| | 2010 | 2009 |
|--|-----------------|-------------------|
| Gains (losses) on foreign exchange from foreign exchange forward contracts | \$ 1,851 | \$ (39,294) |
| Losses on foreign currency exchange on US dollar monetary balances | (258,103) | (354,108) |
| Total losses on foreign currency exchange recognized as Other revenues and expenses | (256,252) | (393,402) |
| Gains (losses) on foreign currency exchange from hedging relationships recognized as Sales | 2,174,466 | (1,822,867) |
| | \$ 1,918,214 | \$ (2,216,269) |
| | | |

The Corporation does not hold or issue any derivative financial instruments for speculative or trading purposes. Derivative financial instruments are subject to standard credit conditions, financial controls, risk management as well as monitoring procedures.

Impact of US dollar foreign exchange risk on monetary items denominated in US dollars:

| 1 | | |
|--|--------------|--------------|
| | 2010 | 2009 |
| Cash and cash equivalents | \$ 6,508,393 | \$ 3,468,764 |

| Long-term loans, including current portion | 370,000 | 125,231 |
| Accounts payable | (373,816) | (676,335) |
| Long-term debt, including current portion | (1,978,769) | (2,079,010) |
| Total monetary items denominated in US dollars | \$ 9,062,745 | \$ 4,334,172 |

As at December 31, 2010, with other variables unchanged, an upward or downward change of \$0.01 in the value of the Canadian dollar against the US dollar would have the effect of decreasing or increasing Other revenues and expenses in the amount of \$91,000 (December 31, 2009 - \$43,000), \$65,000 (December 31, 2009 - \$30,000) net of income taxes.

Interest rate risk

(in US dollars)

The Corporation's interest rate risk arises from its bank loans and its long-term debt, its long-term investments and its long-term loans. Borrowings issued at variable rates expose the Corporation to the risk of variance in cash flows due to changes in interest rates, whereas investments and borrowings issued at fixed rates expose the Corporation to the risk of variance in fair value due to changes in interest rates.

The Corporation has at its disposal a line of treasury in the amount of \$600,000 to cover any potential loss in case it chooses to convert its variable interest rate long-term debt in the amount of \$6,000,000 to a fixed rate debt.

The Corporation analyses its interest risk exposure on a continual basis and examines its renewal and refinancing options in order to minimize risks.

Impact of interest rate risks on monetary items with a variable interest rate:

| | | 2010 | 2009 |
|---|----|-------------|-------------------|
| Cash and cash equivalents | \$ | (6,040,620) | \$ (4,823,164) |
| Long-term investments (guaranteed investment certificate) | ļ | - | (4,100,000) |
| Bank loans | ļ | 1,990,000 | 1,080,000 |
| Long-term debt, including current portion | | 10,439,202 | 10,582,994 |
| Total monetary items with a variable interest rate | \$ | 6,388,582 | \$ 2,739,830 |
| | | | |

As at December 31, 2010 and 2009, with other variables unchanged, an upward or downward change of 100 basis points in the prime rate would only have a negligeable impact on net earnings.

Price risk

The Corporation's products include hundreds of components manufactured by some 100 suppliers around the world. The price of such components can vary and affect the Corporation's profit margins. However, the Corporation's flexible business model enables it to change supplier if required in order to minimize this risk.

The Corporation does not make use of derivative products on the price of materials.

B) Credit risk

Cash and cash equivalents are held or issued by financial institutions with a superior-quality credit rating. Hence, the Corporation considers that the risk of non-performance of such considerations is negligible. Investments in retructured notes are subject to uncertainty as to their eventual cash value (note 9).

The Corporation provides credit to its clients in the normal course of business. It carries out credit checks on its clients on a continual basis and minimizes its credit risks by conducting its operations with a wide variety of clients in several industries.

Trade receivables are presented on the balance sheet net of an allowance for doubtful accounts. The allowance is based on the Corporation's best estimate as to the probability of collecting uncertain accounts. Uncertainty regarding the collection of accounts may derive from various indicators, including a deterioration in the credit-worthiness of a client or an abnormal delay in payment of past-due invoices. Management regularly reviews client accounts, ensures that past-due accounts are followed up and evaluates the relevance of its allowance for doubtful accounts.

As at December 31, trade receivables were classified in the following chronological order:

| 2010 | Current 0-60 days | | 60-90 days | | ver 90 days | Total |
|---|---------------------------|----|---------------------|----|------------------------|------------------------------|
| Trade Allowance for doubtful accounts Balance that is not allowed for | \$ 6,595,500 | \$ | 1,591,377 74,904 | \$ | 2,087,099 577,899 | \$ 10,273,976 652,803 |
| balance that is not allowed for | \$ 6,595,500 | \$ | 1,516,473 | Þ | 1,509,200 | \$ 9,621,173 |
| 2009 | Current 0-60 days | | 60-90 days | C | ver 90 days | Total |
| Trade Allowance for doubtful accounts | \$ 5,014,080 38,787 | \$ | 988,124 73,171 | \$ | 2,395,359 1,368,595 | \$ 8,397,563 1,480,553 |
| Balance that is not allowed for | \$ 4,975,293 | \$ | 914,953 | \$ | 1,026,764 | \$ 6,917,010 |

The following table shows how the allowance for doubtful accounts changed since December 31:

| | 2010 | | 2009 |
|--|-----------------|----|-----------|
| Allowance for doubtful accounts at the beginning of the year | \$ 1,480,553 | \$ | 1,221,371 |
| Increase in allowance | 67,533 | | 865,269 |
| Write-off of accounts | (895,283) | | (606,087) |
| Allowance for doubtful accounts at the end of the year | \$ 652,803 | \$ | 1,480,553 |
| | | | |

For other debts, the Corporation continually assesses probable losses and sets up a provision for losses based on their estimated realizable value.

C) Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its obligations as they fall due. Management assesses its liquidity risk on a continual basis to ensure that it has sufficient liquidity to meet its obligations. In order to ensure that sufficient liquidity is available to meet current obligations, the Corporation maintains similar payment terms with its customers as it has with its suppliers. The Corporation has sufficient credit facilities available to make up for temporary lapses in synchronization of inflows and outflows of funds.

As at December 31, 2010, the Corporation had at its disposal working capital of \$19,413,037 (December 31, 2009 - \$17,788,827) and unused credit facilities of \$1,510,000 (December 31, 2009 - \$2,420,000).

The following are the contractual obligations of financial liabilities as at December 31:

| 2010 | | Carrying amount | | , , | | Contractual cash flows | | 0 to 6 months | | 6 to 12 months | 12 to 24 months | lore than 4 months |
|---|----|------------------------|----|------------------------|----|------------------------|----|------------------|--------------------|--------------------|--------------------|-----------------------|
| Bank loans Accounts payable Long-term debt, including | \$ | 1,990,000 6,686,515 | \$ | 2,065,656 6,686,515 | \$ | 330,813 6,686,515 | \$ | 440,569 - | \$ 678,138 - | \$ 616,136 - | | |
| current portion | | 13,391,765 | | 14,431,869 | | 1,868,619 | | 1,793,001 | 4,177,564 | 6,592,685 | | |
| • | \$ | 22,068,280 | \$ | 23,184,040 | \$ | 8,885,947 | \$ | 2,233,570 | \$ 4,855,702 | \$ 7,208,821 | | |

| 2009 | | Carrying amount | | , , | | Contractual cash flows | | 0 to 6 months | | 6 to 12 months | | 12 to 24 months | | More than 4 months |
|---|----|------------------------|----|------------------------|----|------------------------|----|------------------|----|-------------------|----|--------------------|--|-----------------------|
| Bank loans Accounts payable Long-term debt, including | \$ | 1,080,000 6,248,985 | \$ | 1,128,019 6,248,985 | \$ | 509,425 6,248,985 | \$ | 59,019 - | \$ | 115,600 - | \$ | 443,975 - | | |
| current portion | | 10,696,919 | | 11,170,819 | | 1,031,708 | | 1,018,199 | | 3,207,136 | | 5,913,776 | | |
| | \$ | 18,025,904 | \$ | 18,547,823 | \$ | 7,790,118 | \$ | 1,077,218 | \$ | 3,322,736 | \$ | 6,357,751 | | |

24. GOVERNMENT ASSISTANCE

During 2010, the Corporation recorded research and development tax credits of \$620,339 (2009 - \$484,912) as well as apprenticeship tax credits in the amount of \$95,418 (2009 - nil). These credits, of which \$655,221 (2009 - \$177,322) has not yet been assessed by the tax authorities, were accounted for as follows:

| | 2010 | 2009 |
|---|---------------|---------------|
| Decrease in deferred development costs | \$ 107,764 | \$ 141,289 |
| Decrease in cost of goods sold | 95,418 | 19,279 |
| Decrease in selling and administrative expenses | 512,575 | 324,344 |
| | \$ 715,757 | \$ 484,912 |
| | | |

DECEMBER 31, 2010 AND 2009

25. SEGMENTED INFORMATION

The Corporation's business structure is divided into two segments: the first consists of manufacturing and distributing residential and commercial accessibility equipment for people with mobility challenges (Accessibility), and the second consists of converting and adapting vehicles for persons with a physical disability (Adapted Vehicles).

The accounting policies used for these reportable segments are consistent with those described in the summary of significant accounting policies.

The business segments are detailed as follows:

| | | 2010 | | 2009 | | | | | | |
|---------------------------|--------------------------------|---------------|---------------|---------------|---------------------|---------------|--|--|--|--|
| | Accessibility Adapted Vehicles | | Total | Accessibility | Adapted Vehicles | Total | | | | |
| Sales | \$ 50,773,587 | \$ 14,462,188 | \$ 65,235,775 | \$ 43,216,484 | \$ 11,955,840 | \$ 55,172,324 | | | | |
| Operating earnings | 4,325,341 | 22,220 | 4,347,561 | 2,198,283 | 556,280 | 2,754,563 | | | | |
| Net earnings (loss) | 2,534,181 | (59,801) | 2,474,380 | 1,730,115 | 528,035 | 2,258,150 | | | | |
| Amortization | 1,031,094 | 221,926 | 1,253,020 | 712,872 | 121,257 | 834,129 | | | | |
| Additions to fixed assets | 360,029 | 32,227 | 392,256 | 176,386 | 22,784 | 199,170 | | | | |
| Assets | 38,675,961 | 9,283,852 | 47,959,813 | 34,768,689 | 5,119,258 | 39,887,947 | | | | |
| Goodwill | 4,204,526 | 769,745 | 4,974,271 | 506,230 | - | 506,230 | | | | |
| | | | | | | | | | | |

Information by geographic region is as follows:

| | Sa | les | | Fixed assets | ssets and goodwill | | | | |
|----------------------|------------------|-----|------------|-----------------|--------------------|-----------|--|--|--|
| | 2010 | | 2009 | 2010 | | 2009 | | | |
| United States | \$ 27,581,659 | \$ | 25,331,120 | \$ • | \$ | - | | | |
| Canada | 31,173,827 | | 24,007,809 | 6,638,164 | | 1,923,777 | | | |
| Europe and elsewhere | 6,480,289 | | 5,833,395 | 178,467 | | 148,237 | | | |
| | \$ 65,235,775 | \$ | 55,172,324 | \$ 6,816,631 | \$ | 2,072,014 | | | |
| | | | | | | | | | |

26. COMPARATIVE FIGURES

Certain figures for the previous year have been reclassified to conform to the presentation adopted in 2010.
